- Bee Keepers • Campers • Farms • Orchards • Gvt. Agencies
- Expeditions • Boaters • Individuals • World Wide

Critter Gitter is a powerful deterrent that works on any size and type of nuisance animal by detecting and then Repelling and frightening them away. A very high-pitched and unfamiliar sound, plus flashing red lights, causes intruding animals to immediately retreat and discourages their return.

KEY FEATURES

Horn emits 120-decibel sound for approximately 5 seconds. A different sound is generated each time unit is tripped. Two High-Intensity Lights (simulating eyes) flash Red during alarm cycle. Self-powered by standard 9 Volt battery (Included).
